Project Design Phase
Problem – Solution Fit Template

Date	17 October 2026
Project Name	Metro Ticket Generating System using ServiceNow
Maximum Marks	2 Marks

Problem – Solution Fit Template

Problem–Solution Fit means identifying a real passenger problem and designing a solution that addresses the passenger's needs. This project focuses on making metro ticket booking faster and more accessible through ServiceNow by combining station selection, automatic fare calculation, QR-code ticket generation, and booking notifications.

Purpose

- Solve passenger booking problems with a digital workflow that fits their travel needs.
- Reduce time spent on manual booking and repeated data entry.
- Communicate fares and ticket status clearly through the booking experience.
- Build trust through reliable ticket generation and confirmation notifications.
- Understand passenger difficulties and improve the ticket-booking process.

1. CUSTOMER SEGMENTS

Metro passengers who want to book tickets quickly, including commuters and occasional travellers.

6. CUSTOMER CONSTRAINTS

Limited time, unclear station choices, uncertain fare details, mobile/data access issues, or difficulty retrieving a ticket.

5. AVAILABLE SOLUTIONS

Ticket counters, vending machines, existing metro apps, and the proposed ServiceNow booking workflow.

2. JOBS-TO-BE-DONE / PROBLEMS

Select stations, know the fare, complete booking quickly, and receive a usable digital ticket.

9. PROBLEM ROOT CAUSE

Booking, fare calculation, ticket generation, and confirmation may be separate or manual rather than one automated process.

7. BEHAVIOUR

Searches for booking, selects stations, reviews fare, submits details, and checks for confirmation.

3. TRIGGERS

Need to travel, rush-hour queues, a planned journey, or a preference for paperless tickets.

10. YOUR SOLUTION

Service Catalog captures journey details; fare logic calculates the fare; Flow Designer automates ticket creation; QR ticket and Notifications provide confirmation.

8. CHANNELS OF BEHAVIOUR

Online: ServiceNow portal/catalog item and digital notification. Offline alternatives may include ticket counters or vending machines.

4. EMOTIONS: BEFORE / AFTER

Before: rushed or uncertain about fare/ticket status. After: more confident with clear fare, QR ticket, and booking confirmation.

Problem–Solution Fit Summary

The proposed solution fits the passenger's need by connecting booking input, fare calculation, ticket generation, and confirmation in one guided ServiceNow workflow. Its fit should be validated by testing whether passengers can complete bookings accurately, understand the fare, and access the generated QR-code ticket.
