1. Purpose of Document

The purpose of this document is to summarize the planned test coverage and open issues for the Metro Ticket Generating System using ServiceNow at the time of release to User Acceptance Testing (UAT). The report covers station selection, input validation, automatic fare calculation, Flow Designer booking processing, QR-code ticket generation, and booking notifications.

2. Defect Analysis

This section records defects by resolution and severity. Severity 1 = Critical, Severity 2 = High, Severity 3 = Medium, Severity 4 = Low. Since actual UAT execution data was not provided, the counts below are a blank planning baseline and must be updated after testing.

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
By Design	0	0	0	0	0
Duplicate	0	0	0	0	0
External	0	0	0	0	0
Fixed	0	0	0	0	0
Not Reproduced	0	0	0	0	0

Record each defect ID, severity, resolution, and current status from the actual UAT defect log. Do not mark defects as fixed or closed unless the resolution has been verified.

3. Test Case Analysis

The table below lists suggested UAT cases for the Metro Ticket Generating System. Pass, Fail, and Not Tested values are intentionally left as placeholders until tests are executed in the actual ServiceNow instance.
